critical care—closer to home!*

ADVANCED PULMONARY AND INTENSIVE CARE

Pulmonary Medicine

At Western Missouri Specialty Services – Pulmonology, our Board-Certified physician Bedilu Woldaregay, MD, is dedicated to providing advanced pulmonary care to a variety of patients, including the critically-ill and hospitalized patients requiring ventilators. Pulmonary medicine focuses on disorders of the lungs and airways. Some conditions include asthma, cystic fibrosis, COPD, pneumonia, bronchitis, emphysema and cancer.

Our Inpatient Services

- Bronchoscopy and lung biopsy
- Central line and arterial line placement/management
- Ventilator management
- Swan-Ganz catheters
- Chest tubes
- Closed pleural biopsies
- Fluid management
- Methacholine challenge interpretation
- Pulmonary consults
- Pulmonary function interpretation
- Six-minute walk interpretation
- Thoracentesis

Our Outpatient Services

- Asthma/COPD management
- Bronchoscopy/thoracentesis
- Methacholine challenge interpretation
- Pulmonary consults and follow-ups
- Pulmonary function interpretation

Bedilu Woldaregay, MD

Dr. Woldaregay is Board Certified in Internal Medicine and Pulmonary Medicine. He earned his medical degree and completed an Internal Medicine residency at Addis Ababa University Medical Faculty in Ethiopia.

After practicing medicine in Ethiopia at Zennaba General Hospital, Dr. Woldaregay completed an Internal Medicine residency and Pulmonary Medicine fellowship at Interfaith Medical Center in Brooklyn, NY. Dr. Woldaregay then practiced Pulmonary and Critical Care Medicine at Skaggs Regional Medical Center in Branson, MO, and also provided hospitalist coverage at Research Medical Center.

Our Pulmonary Rehabilitation Services

Our Rehabilitation Program is for patients with chronic lung diseases like COPD, emphysema and chronic bronchitis. The program aims to help patients lead a more active lifestyle and restore them to their highest functional capacity. The goal of our pulmonary rehab is to improve quality of life by:

- Encouraging the ability to manage illness and improve control over daily functions
- Improving physical conditioning and educating towards ongoing exercise performance
- Improving emotional well-being
- Reducing hospitalizations

Our multi-disciplinary program features an initial evaluation followed by education in chronic lung breathing techniques. We create an individualized exercise program and share techniques in stress management.
